DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: The claimed method (claim 1), servo loop (claim 10) and disc drive (claim 20) that provides a feedforward signal for track following, where this signal has harmonic components that are updated at a sampling rate that is a fraction of a servo sector sampling rate is neither taught by nor an obvious variation of the art of record.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takeuchi et al. teaches generating runout correction data greater than the selected group of servo sectors. Liu et al. teaches an arrangement that compensates for both repeatable and non-repeatable errors in a disk arrangement.
